DETAILED ACTION

Status of the Application

Receipt of the Response and Amendment after Non-Final Office Action, Applicant's Arguments/Remarks and the request for extension of time (1 month-granted), all filed 05/15/2006 is acknowledged.

Claims 1 and 3-10 are pending in this action. Claims 1, 3, 4 and 10 have been amended. Claim 2 has previously been cancelled. Claims 1 and 3-10 are allowed.

EXAMINER'S AMENDMENT

The application has been amended as follows:

In the Specification:

On page 1, line 15, after the title of the invention, the following has been added: **"This application claims benefit of foreign priority to German Application No. 299 11 111.3 filed June 25, 1999"**.

On page 1, beginning on line 16, the title **"FIELD OF THE INVENTION"** has been added.

On page 1, line 19, the title "Introduction and state of the art" has been deleted and replaced with **"BACKGROUND OF THE INVENTION"**.

On page 2, beginning on line 17, the title “**SUMMARY OF THE INVENTION**” has been added.

On page 2, line 28, the title “Detailed description of the technical solution” has been changed to “**DETAILED DESCRIPTION OF THE INVENTION**”.

In the Abstract:

A new Abstract has been provided.

Allowable Subject Matter

Claims 1 and 3-10 are allowed.

The following is an examiner’s statement of reasons for allowance:

The primary reasons for allowance are that the prior art (Hoffman *et al.* – U.S. Pat. No. 5,538,736 & Mori – U.S. Pat. No. 5,695,779) does not disclose nor fairly suggest or teach a flat self-adhering plaster as instantly claimed that consists of a cover, a layer of adhesive, a ring of adhesive free of plasticizing additive and a removable carrier whereby the core is the only active ingredient or cosmetically active agent area. The instant invention requires only one (1) reservoir; an active agent area only provided in the core of the plaster. The instant ‘consisting of’ language excludes the additional reservoirs and components contained in the prior art plaster formulations. The prior art further fails to disclose or teach a plaster having reduced cold flow, whereby the degree of adhesion varies across the inner and outer parameters of the plaster.

In stark contrast, the prior art (Hoffman *et al.* ‘736) requires a first and second active substance reservoir. The prior art (Mori ‘779) also requires microcapsules that encapsulate drugs

Art Unit: 1615

as core material, as well as water-insoluble, rubber- and rubber solvent-insoluble water absorbing resin powder that is dispersed in the adhesive. The prior art fails to provide a flat self-adhering plaster as instantly claimed that provides for an active ingredient or cosmetically active agent area provided in the core only. The prior art also lacks in terms of varying degrees of adhesion across the plaster.

The instant invention demonstrates an improvement over prior art plaster formulations in that the instantly claimed plaster avoids the use of a combination of multiple adhesives and reservoir layers as employed in the art. The instant plaster provides for good adhesion and bonding properties with the skin.

Thus, in view of the improvements demonstrated by the instant invention and the lack of teachings by the prior art, the instant invention is rendered non-obvious and patentable over the cited art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
